Letters to the Editor

COMPTEL observations of ^{44}Ti gamma-ray line emission from Cas A

Iyudin A.F., Diehl R., Bloemen H., Hermsen W., Lichti G.G., Morris D., Ryan J., Schönfelder V., Steinle H., Varendorff M., de Vries C., Winkler C.

On the neon abundance in PG 1159-type central stars of planetary nebulae

Werner K., Rauch T.

UBV-JHKLM photometry of Nova Aquilae 1993. The first 220 days

Munari U., Yudin B.F., Kolotilov E.A., Shenavrin V.I., Sostero G., Lepardo A.

Multi-wavelength intra-peak phase separations in pulsed emissions from the Crab and the Vela pulsars

Ramanamurthy P.V.

A revision to the absolute magnitudes of RR Lyrae stars from the Baade-Wesselink method

Fernley J.

Investigating the magnetic field structure around star formation cores

Greaves J.S., Murray A.G., Holland W.S.

CO and C1 maps of the starburst galaxy M 82

White G.J., Ellison B., Claude S., Dent W.R.F., Matheson D.N.

Infrared line emission in 10 Lacertae

Murdoch K.A., Drew J.E., Anderson L.S.

A Faber-Jackson relation for clusters of galaxies: implications for modified dynamics

Sanders R.H.

Extragalactic astronomy

Far-ultraviolet diffuse background and galaxy counts

Armand C., Milliard B., Deharveng J.M.

Dense gas in nearby galaxies. VII. The active nucleus of NGC 4945

Henkel C., Whiteoak J.B., Mauersberger R.

AGN emission above 20 keV: the hard X-ray detection problem

Maisack M., Wood K.S., Gruber D.E.

Monitoring of active galactic nuclei. IV. The Seyfert 1 galaxy NGC 4593

Dietrich M., Kollatschny W., Alloin D., Arexaga I., Axon D., de Bruyn A.G., Clavel J., Goad M.R.,

Gondhalekar P., van Groningen E., Horne K., Jackson N., Laurikainen E., Lawrence A., Masegosa J., Moles M., O'Brien P., del Olmo A., Penston M.V., Perea J.,

Pérez E., Pérez-Fournon I., Perry J.J., Peterson B.M., Robinson A., Rodríguez Espinosa J.M., Stirpe G.M.,

Tadhunter C., Terlevich R., Unger S., Wagner S.J., Wanders I., Williams R.

17

53

A toolbox for general elliptical gravitational lenses

Schramm T.

44

Synchrotron emission from bent shocked relativistic jets. II. Shock waves in helical jets

Gómez J.L., Alberdi A., Marcaide J.M.

51

HST observations of Cygnus A: circumnuclear effects of a powerful jet?

Jackson N., Sparks W.B., Miley G.K., Macchetto F.

65

HST observations of globular clusters in M 31. I. Surface photometry of 13 objects

Fusi Pecci F., Battistini P., Bendinelli O., Bönnoli F.,

Cacciari C., Djorgovski S., Federici L., Ferraro F.R.,

Parmeggiani G., Weir N., Zavatti F.

349

Analysis of the velocity-distance diagrams in the presence of the Great Attractor

Ekholm T., Teerikorpi P.

369

ROSAT PSPC X-ray observations of NGC 4258: detection of point sources, 4 million K halo emission, and anomalous arms

Pietsch W., Vogler A., Kahabka P., Jain A., Klein U.

386

Molecules in the starburst galaxy Henize 2-10

Baas F., Israel F.P., Koornneef J.

403

Time-evolution of axisymmetric magnetic fields in galaxies

Camenzind M., Lesch H.

411

Cosmology

Large-scale correlations between QSOs and IRAS galaxies

Bartelmann M., Schneider P.

1

The large-scale structure in a universe dominated by cold plus hot dark matter

Jing Y.P., Mo H.J., Börner G., Fang L.Z.

The effect of gravitational lensing on the texture of the cosmic microwave background

Cayón L., Martínez-González E., Sanz J.L.

703

719

Synchrotron radiation from the jet of 3C 273. III. The speed and direction of the jet	724	Numerical simulations of convection at the surface of a ZZ Ceti white dwarf	105
<i>Conway R.G., Davis R.J.</i>		<i>Ludwig H.-G., Jordan S., Steffen M.</i>	
Galactic dynamics and magnetic fields. II. Magnetic fields in barred galaxies	731	On the binary nature of Pleione	118
<i>Chiba M., Lesch H.</i>		<i>Luhrti R., Menchenkova E.V.</i>	
Metallicity effects in star-forming regions	749	On the modulated light in the intermediate polar FO Aquarii/H 2215-086	
<i>Cerviño M., Mas-Hesse J.M.</i>		<i>de Martino D., Buckley D.A.H., Mouchet M., Mukai K.</i>	125
The Hamburg Quasar Monitoring program (HQM) at Calar Alto. I. Low amplitude variability in quasars	764	Evolution of initially mixed massive main sequence stars	138
<i>Borgeest U., Schramm K.-J.</i>		<i>Weiss A.</i>	
The intrinsic magnetic field orientation in NGC 4631	777	The hot wind in the symbiotic nova AG Pegasi	145
<i>Golla G., Hummel E.</i>		<i>Vogel M., Nussbaumer H.</i>	
Photometric evolutionary synthesis models of dwarf galaxies	793	S 32 and UKS-Cel: two barium-rich symbiotic stars	156
<i>Krüger H., Fritze-v. Alvensleben U.</i>		<i>Schmid H.M.</i>	
Morphological segregation of galaxies in clusters. I. The non-uniform distribution of types in the inner region of Perseus	801	Energy-dependent effects of scattering atmospheres on X-ray pulsar pulse profiles	
<i>Andreon S.</i>		<i>Sturner S.J., Dermer C.D.</i>	161
Galactic structure and dynamics		A long period model for the magnetic star γ Equulei	
The chemical composition at a galactocentric distance of 13 kpc	72	<i>Leroy J.L., Bagnulo S., Landolfi M., Landi Degl'Innocenti E.</i>	174
<i>Rolleston W.R.J., Dufton P.L., Fitzsimmons A.</i>		On the pre-decline and decline phases of FG Sagittae, the post-AGB star and central star of the planetary nebula PK 60-7.1	
A new <i>UBV</i> and proper motion survey in the anticentre direction at intermediate galactic latitude: kinematics of the Galaxy's stellar populations	793	<i>van Genderen A.M.</i>	465
<i>Ojha D.K., Bienaymé O., Robin A.C., Mohan V.</i>		Can nucleosynthesis determine the mass limit for stellar black hole formation?	
Stellar clusters and associations		<i>Prantzos N.</i>	477
A study of the color-magnitude diagrams and luminosity functions of the two LMC clusters NGC 2134 and NGC 2249 with the new radiative opacities	424	Enhancement of thermonuclear reaction rates in dense stars	
<i>Vallenari A., Aparicio A., Fagotto F., Chiosi C.</i>		<i>Sahrling M.</i>	484
The galactic distribution of chemical elements as derived from B-stars in open clusters. I. NGC 6231: stellar parameters and chemical abundances	437	49 Camelopardalis: an uncommon magnetic star	
<i>Kilian J., Montenbruck O., Nissen P.E.</i>		<i>Leroy J.L., Landstreet J.D., Bagnulo S.</i>	491
Active star formation regions at the edge of the LMC Bar: NGC 1850 and NGC 1858	447	OT 1928: a real candidate for GRB 781119	
<i>Vallenari A., Aparicio A., Fagotto F., Chiosi C., Ortolani S., Meylan G.</i>		<i>Hudec R., Pravec P., Borovička J.</i>	499
Hot stars near the position of X0512-401 in the globular cluster NGC 1851	457	Discovery of a luminous galactic supersoft X-ray source in the ROSAT all-sky survey	
<i>Aurière M., Bonnet-Bidaud J.M., Koch-Miramond L.</i>		<i>Močk C., Hasinger G., Pietsch W.</i>	827
Formation, structure and evolution of stars		Optical studies in the fields of gamma ray burst sources. II. GRB 910219 and the detection of flashing optical counterpart	
New spectroscopic orbital elements of the B-type binary HR 7551	82	<i>Hudec R., Dědová A., Pravec P., Borovička J.</i>	839
<i>Raja T.</i>		New photometric and spectroscopic results for IU Aurigae – an early-type eclipsing binary in a multiple system	
(RN) Estimates of the Compton backscattering feature at ~150 keV in the Crab Nebula pulsar	85	<i>Drechsel H., Haas S., Lorenz R., Mayer P.</i>	853
<i>Bednarek W., Cremonesi O., Treves A.</i>		Stellar atmospheres	
Rotational modulation and flares on RS Canum Venaticorum and BY Draconis stars. XVIII. Coordinated VLA, ROSAT, and IUE observations of RS CVn binaries	91	Effects of TiO in stellar atmospheres	
<i>Fox D.C., Linsky J.L., Veale A., Dempsey R.C., Brown A., Neff J.E., Pagano I., Rodonò M., Bromage G.E., Kürster M., Schmitt J.H.M.M.</i>		<i>Jørgensen U.G.</i>	179
Long-term periodic variability in UV absorption lines of the Be star γ Cassiopeiae: on the relation with V/R variations in the H β line	91	Simulation of polarization maps. I. Protostellar envelopes	
<i>Telting J.H., Kaper L.</i>		<i>Fischer O., Henning T., Yorke H.W.</i>	187
The ultraviolet variations of the δ Scuti stars 44 Tauri and 71 Tauri	91	The ultraviolet variations of the δ Scuti stars 44 Tauri and 71 Tauri	
<i>Monier R., Kreidl T.J.</i>		<i>Monier R., Kreidl T.J.</i>	210
Synthetic line profiles for supernovae of type II	91	Synthetic line profiles for supernovae of type II	
<i>Best M., Wehrse R.</i>		<i>Best M., Wehrse R.</i>	507
Long-term periodic variability in UV absorption lines of the Be star γ Cassiopeiae: on the relation with V/R variations in the H β line	91	Long-term periodic variability in UV absorption lines of the Be star γ Cassiopeiae: on the relation with V/R variations in the H β line	
<i>Telting J.H., Kaper L.</i>		<i>Telting J.H., Kaper L.</i>	515

Resonance line polarization for arbitrary magnetic fields in optically thick media. III. A generalization of the γ/ϵ -law	
<i>Landi Degl'Innocenti E., Bommier V.</i>	865
High-dispersion H α spectroscopy of ε Aurigae	
<i>Cha G., Tan H., Xu J., Li Y.</i>	874
H α survey of late-type active binaries	
<i>Frasca A., Catalano S.</i>	883
The EUV spectrum of AU Microscopii: temperature and density diagnostic from EUVE Spectrometers observations	
<i>Monsignori Fossi B.C., Landini M.</i>	900
Spectral analysis of the hottest known helium-rich white dwarf: KPD 0005+5106	
<i>Werner K., Heber U., Fleming T.</i>	907
Diffuse matter in space (including Hα regions and planetary nebulae)	
Water masers embedded in ultracompact H α regions: the W 75N cloud core	
<i>Hunter T.R., Taylor G.B., Felli M., Tofani G.</i>	215
Very-broadband-structure and the linear rise in the extinction curve	
<i>Jenniskens P.</i>	227
H α regions and IRAS PSC sources: the reliability of the association	
<i>Codella C., Felli M., Natale V.</i>	233
On the interstellar grains in the Magellanic Clouds and in the Galaxy	
<i>Macchioni A., Perinotto M.</i>	241
Filling factors and ionized masses in planetary nebulae	
<i>Boffi F.R., Stanghellini L.</i>	248
Proper motion measurements and high resolution imaging of the HH 46/47 outflow	
<i>Eislöffel J., Mundt R.</i>	530
Carbon monoxide line emission from photon dominated regions	
<i>Köster B., Störzer H., Stutzki J., Sternberg A.</i>	545
W 3 – a study of a site of massive star formation. I. Continuum and C ¹⁸ O observations and comparison as mass tracers	
<i>Oldham P.G., Griffin M.J., Richardson K.J., Sandell G.</i>	559
An X-ray study of IC 443 and the discovery of a new supernova remnant by ROSAT	
<i>Asaoka I., Aschenbach B.</i>	573
Laboratory simulation of microdiamonds present in space	
<i>Colangeli L., Mennella V., Stephens J.R., Bussoletti E.</i>	583
An investigation of extinction diagnostics towards the Orion Nebula	
<i>Greve A., Castles J., McKeith C.D.</i>	919
Far-infrared observations of three Galactic star-forming regions: RCW 36, IRAS 10361–5830 and IRAS 10365–5803	
<i>Verma R.P., Bish R.S., Ghosh S.K., Iyengar K.V.K., Rengarajan T.N., Tandon S.N.</i>	936
Mass loss and the evolution of planetary nebula nuclei	
<i>Górny S.K., Tylenda R., Szczerba R.</i>	949
The contribution of small particles to the extinction curve	
<i>Boulanger F., Prévôt M.L., Gry C.</i>	956
Discovery of a giant molecular cloud near the Galactic centre	
<i>Albinson J.S., Evans A., Krautter J., Weight A.</i>	971
The Sun	
Does solar differential rotation arise from a large scale instability?	
<i>Tuominen I., Brandenburg A., Moss D., Rieutord M.</i>	259
A new estimate of the solar core rotation from IPhIR	
<i>Toutain T., Kosovichev A.G.</i>	265
On the correlation of magnetic field strength and inclination with continuum brightness of a sunspot penumbra	
<i>Hofmann J., Deubner F.-L., Fleck B., Schmidt W.</i>	269
Alpha effect in the solar atmosphere	
<i>Seehafer N.</i>	593
Propagation of acoustic waves in a stratified atmosphere. I	
<i>Kalkofen W., Rossi P., Bodo G., Massaglia S.</i>	976
Stationary subalfvénic and low-β MHD flows in solar coronal loops and arcades	
<i>Surlantzis G., Démoulin P., Heyvaerts J., Sauty C.</i>	985
The solar system	
Fine structure of the 1985 Giacobinids	
<i>Šimek M.</i>	276
Production of anomalous cosmic rays from pick-up ions and their inward diffusion from the termination shock of the solar wind	
<i>Fichtner H., Fahr H.-J., Grzedzinski S., Rucinski D., Sreenivasan S.R.</i>	599
Is there any mechanism capable of producing the same Fresnel characteristics as fragmentation of meteoroids?	
<i>Novikov G.G., Pecina P., Radzhabov T.S.</i>	612
Celestial mechanics and astrometry	
The main problem of geosynchronous satellite theory around an equilibrium position	
<i>Oberti P.</i>	281
Analysis of ground-based observations of the satellites of Saturn 1874–1988	
<i>Harper D., Taylor D.B.</i>	619
Correction to the luni-solar precession from Very Long Baseline Interferometry	
<i>Walter H.G., Ma C.</i>	1000
Physical and chemical processes	
Isothermal elliptical gravitational lens models	
<i>Kormann R., Schneider P., Bartelmann M.</i>	285
Vacuum polarization and nuclear reactions at energies of astrophysical interest	
<i>Degl'Innocenti S., Fiorentini G.</i>	300
Oscillator strength measurements in the vacuum-ultraviolet. VI. Neutral oxygen lines in the 950–1200 Å range	
<i>Goldbach C., Nollez G.</i>	307
The role of electric currents in saturated conduction. I. General theory	
<i>Bandiera R., Chen Y.</i>	629
The role of electric currents in saturated conduction. II. Suprathermal evaporation of clouds in supernova remnants	
<i>Bandiera R., Chen Y.</i>	637
Special relativistic jet collimation by inertial confinement	
<i>Eulderink F., Mellema G.</i>	654
Exact solutions for helical MHD equilibria of astrophysical jets	
<i>Villata M., Ferrari A.</i>	663

The equation of state in the chemical picture: a grand-canonical approach. II. The occupation number of molecules and atoms	679	Abstracts of articles which have been published in A. & A. Suppl. Ser. 104, No. 1	699
<i>Luo G.</i>		Search for faint ring-shaped galaxies in the -77° to -87° declination interval	
The equation of state in the chemical picture: a grand-canonical approach. III. Thermodynamic properties and non-ideal effects		<i>Faúndez-Abans M., Cuevas H.L., Hertling G.P.</i>	699
<i>Luo G.</i>	684	<i>uvbyβ</i> photometry of all stars earlier than G0 and brighter than $m_{\text{pg}} \approx 10.3$ in Selected Area 194	
Gravitational lenses as giant diffractive telescopes	689	<i>Franco G.A.P.</i>	699
<i>Labeyrie A.</i>		High-spatial-resolution solar observations of spectral lines used for abundance analysis	
One-dimensional equilibrium structures of infinitely thin polytropic sheets	699	<i>Kiselman D.</i>	699
<i>Schmitz F.</i>	1007	A catalogue of <i>UBV</i> colours of cataclysmic variables (second edition)	
Empirical corrections of the rigid rotor interaction potential of $\text{H}_2\text{-H}_2$ in the attractive region; dimer features in the FIR absorption spectra		<i>Bruch A., Engel A.</i>	699
<i>Schaefer J.</i>	1015	Non-variability of the fine-structure constant over cosmological time scales	
Numerical studies of wind accretion using SPH. I. 2D simulations		<i>Potekhin A.Y., Varshalovich D.A.</i>	700
<i>Boffin H.M.J., Anzer U.</i>	1026	The development of the symbiotic nova PU Vulpeculae in the years 1984–1992	
Instruments, data processing, and computational methods		<i>Klein A., Bruch A., Luthardt R.</i>	700
Optical seeing at La Palma Observatory. II. Intensive site testing campaign at the Nordic Optical Telescope		Intense blazar activity in the photopolarimetric light curve of OJ 287	
<i>Vernin J., Muñoz-Tuñón C.</i>	311	<i>Takalo L.O., Sillanpää A., Nilsson K., Kidger M., de Diego J.A.</i>	700
Three-dimensional radiative transfer on a massively parallel computer		Reliable photometric reductions to the standard <i>UBV</i> (or <i>uvby</i>) system and accurate <i>UBV</i> magnitudes of bright standard stars from the northern part of the international Be program	
<i>Väth H.M.</i>	319	<i>Harmanec P., Horn J., Juza K.</i>	700
An updated list of radio flux density calibrators		Catalogue of 1–3 GHz solar flare radio emission	
<i>Ott M., Witzel A., Quirrenbach A., Krichbaum T.P., Standke K.J., Schalinski C.J., Hummel C.A.</i>	331	<i>Isliker H., Benz A.O.</i>	701
Speckle interferometry with a photon-counting detector		Proper motion study of the globular cluster M 3	
<i>Thiébaut E.</i>	340	<i>Tucholke H.-J., Scholz R.-D., Brosche P.</i>	701
Radial-velocity curves of eccentric orbits in general relativity		A near-infrared survey of northern planetary nebulae	
<i>Hadra P., Bao G., Østgaard E.</i>	693	<i>Phillips J.P., Cuesta L.</i>	701
Pyramid maximum entropy images of IRAS survey data		1037 Preview of accepted papers (March 1994)	1054
<i>Bontekoe T.R., Koper E., Kester D.J.M.</i>
